Reaper 4GL – 120

Introduction.

The Harvester Model 4GL – 120 is actually a from – mounted,side – delivery reaper to be attached to 15 hp power tiller. It is quite suitable for cutting and laying down evenly the crops of wheat, paddy rice or other crops that have stalks like wheat and paddy rice.

Years of usage has proven that the harvester(reaper) has the features of compact structure, small volume, light weight, reliable performance, low grain loss rate, easy operation and maintenance and high suitability. This machine can work well in plain or terraced fields, small or large plot provided that the stalk density is limited to a certain extent that the grain yield of such land is more than 10.5 T/hectar, the wind scale is under 5 and the lodging angle of the grain stalk is not more that 30 degrees.

Main Technical Specifications

1	Power Tiller needed	IT 15 (SL) 15hp power tiller
2	LxWxH (mm)	1370x770x640
3	Mass (kg)	78
4	Operator No.	1 person
5	Productivity (ha/h)	0.4 – 0.53
6	Cutting width (m)	1.20
7	Lowest stub left in field (mm)	60
8	Forwarding speed while working (km/h)	4 – 6.5
